Summary

I am currently a System Administrator II at Rite Aid. I have a passion for looking at new technology and continuing to better myself, specifically in the mobile field. I keep myself up to date with all the different operating systems (Windows, macOS, Linux, Android & iOS) and the newest technology trends. I spend my time off hours learning about different technological solutions, as well as work on my development skills. Currently, I'm working on Front-End and Mobile Development! I frequently post some of the things that I am working on in blog/newsletter that I maintain as well. I am also currently pursuing my Doctor of Philosophy (PhD) Degree at Northcentral University!
